

Q1

----- in the form of bog iron is quite plentiful, widespread, and easy to obtain.

- (A) Iron
- (B) Of the iron
- (C) It is iron
- (D) There is iron

Q2

Snakes can swallow animals much larger than their own heads ----- the bones of their jaws can be stretched far apart.

- (A) that
- (B) due to
- (C) because
- (D) in order to

Q3

Deserts ----- the continents of the world and make up about 14 percent of its total land mass.

- (A) all found in
- (B) found in all
- (C) are found in all
- (D) which are found in all

Q4

The English elm tree, -----, has been widely planted in North America.

- (A) it is a native of Europe
- (B) a native of Europe
- (C) that is a native of Europe
- (D) being a native of Europe

Q5

In addition to the African sculpture made of wood, metal, or clay, ----- less enduring form in fabric, beads, feathers, wax, and so on.

- (A) all kinds of
- (B) there are kind of
- (C) all kinds there are of
- (D) there are all kinds of

Q6

Airports must be located ----- to major population centers if air transport is to retain its advantage of speed.

- (A) as possible as near
- (B) near as possible
- (C) as near possible as
- (D) as near as possible

Q7

The American poet Amy Lowell began ----- seriously to poetry at the age of 28, but she published nothing until she was 36.

- (A) to devote herself
- (B) devoting her
- (C) her devoting
- (D) devote herself

Q8

The Egyptians believed that the spirit of a dead person could use ----- articles as that person had used on the earth.

- (A) just
- (B) so just
- (C) just so
- (D) just such

Q 9

The growing of plants for food is a newer human phenomenon; the hunting of animals, on the other hand, is -----.

- (A) older
- (B) an old
- (C) oldest
- (D) the oldest

Q 10

Limestone is a hard and lasting building material ----- and shaped with saws and other tools.

- (A) is easy to be cut
- (B) easily cutting
- (C) which can be easily cut
- (D) easily can be cut

Q 11

People use arithmetic so frequently in everyday life ----- think about it.

- (A) that they ever
- (B) hardly they ever
- (C) that they ever hardly
- (D) that they hardly ever

Q 12

The auto factory in this state opens one of its assembly lines to the public and shows the visitors how various parts of a car -----.

- (A) are put together
- (B) put together
- (C) are putting together
- (D) to put together

The original process ----- was carried out by printing an image from a porous stone slab.

- (A) called lithography
- (B) it is called lithography
- (C) which is lithography
- (D) is lithography

Q 14

Not until the microscope was greatly improved ----- progress rapidly.

- (A) the study of plant anatomy did
- (B) did the study of plant anatomy
- (C) was the study of plant anatomy
- (D) the study of plant anatomy will

Q 15

-----, one of the most important contributors to airplane design was Louis Blériot.

- (A) Next the Wright brothers
- (B) After the Wright brothers.
- (C) Being after the Wright brothers
- (D) He is after the Wright brothers

Q 16

The audible range of frequencies for human beings lies between 20 and 20,000 Hz,
A B
but some animals have a much more wider range of hearing.
C D

Q 17

Jellyfish swim by a kind of jet propulsion, alternately opening and shutting the
A B
bell and so thrusted themselves through the water.
C D

Q 18

All animals, from the microscopically protozoan amoeba to the huge African
A B C
elephant, share the same essential requirements.
D

Q 19

The calculator has largely replaced the manual calculation of sums in division,
A B C
multiplication, subtraction, and adding.
D

Q 20

In the state university system, professors look forward to take one sabbatical every seven years.

A B C
D

Q 21

The early British settlers in North America were, for the most part, English loyalists, and they never considered them as independent Americans.

A B
C D

Q 22

The growth of plants can also be greatly influencing by applying materials known as plant hormones.

A B C
D

Q 23

One of the main responsibilities of the successful business manager is to give good advices to his or her subordinates.

A B
C D

Q 24

The most common type of treatment for bacterial infection it is antibiotics.

A B C D

Q 25

Banks are only the part of the interlocking system of financial institutions that characterizes the modern monetary economy.

Q 26

That year the union leaders pressed for, among other demands, a two-weeks summer vacation for all workers.

Q 27

Until the early 1950s it was generally believed that a child, at least for the first few months of life, was capable of only dim appreciating physical sensation.

Q 28

The English colonists what settled on Roanoke Island in 1585 had hard times in the New World.

Q 29

Because its deep-water harbor and strategic importance, Pearl Harbor is one of the biggest U.S. naval bases.

----- global warming is partially caused by deforestation has not always been obvious.

- (A) In fact
- (B) The fact is
- (C) The fact that
- (D) It is a fact

Q5

----- Mary Lewis was not a professional astronomer, she discovered and named four stars.

- (A) As
- (B) Rather
- (C) Because
- (D) Although

Q6

Cancer can strike a person of any age, ----- it is most common among older people.

- (A) because
- (B) but
- (C) while
- (D) since

Q7

The huge libraries of clay tablets ----- by the Babylonians and the Assyrians lay buried for thousands of years.

- (A) creating
- (B) which were creating
- (C) which created
- (D) which were created

Q8

For a while, a film creates a world ----- a viewer can live.

- (A) being
- (B) in that
- (C) it is
- (D) in which

Q 9

Not until a writer has mastered the basic rules of punctuation ----- style and usage.

- (A) should she begin to experiment with
- (B) she should begin to experiment with
- (C) begins she to experiment with
- (D) she begins to experiment with

Q 10

The alpine lily is ----- alpine species.

- (A) the most tallest among all
- (B) the tallest among all
- (C) among the tallest of all
- (D) among all the tallest

Q 11

More scientific experiments have been done on rats ----- any other animal.

- (A) than of
- (B) than on
- (C) than more
- (D) than that

Q 12

Most motorcycles sold today are ----- machines.

- (A) economically and comfortable
- (B) economically and comfortably
- (C) economical and comfortably
- (D) economical and comfortable

Q 13

The Old London Bridge was built by Peter de Colechurch between 1176 and 1209, ----- an old timber structure.

- (A) which replaced
- (B) replacing
- (C) replaced
- (D) was replaced

Q 14

The pig, ----- many people to be lazy, dirty, and stupid, is actually one of the most intelligent of all animals.

- (A) believing
- (B) which is believed
- (C) believed by
- (D) believe in

Q 15

Abraham Lincoln is ----- one of the greatest American presidents.

- (A) regarded being
- (B) regarded as
- (C) in regard to
- (D) regarded

Written Expression

Q 16

Microorganisms they have been used for thousands of years in the production of wine, beer, and cheese.

Q 17

Prenatal care and prevention of infection in mothers at childbirth have reduced down maternal mortality.

Q 18

There has been many breakthroughs in the field of physics in the last decade, particularly in quantum computing.

Q 19

People have been using various kinds of cleansing agents for thousands of years, because water itself do not readily get rid of dirt and grease.

Q 20

In addition to their strong smell, garlic is believed in folk medicine to have healing qualities.

A B C D

Q 21

Mule deer are so named because their large ears resemble that of mules.

A B C D

Q 22

Some wave motion occurred at great depth, but most waves are caused by the wind blowing over an open stretch of water.
